## How to in Details

### **1. What are the Server Requirements to activate the script?**

**Ans:** To install the Script minimum server requirements are:

- Php version 7.2+
- MySQL 5.6+
- mod\_rewrite Apache
- BCMath PHP Extension
- Ctype PHP Extension
- JSON PHP Extension
- Mbstring PHP Extension
- OpenSSL PHP Extension
- PDO PHP Extension
- Tokenizer PHP Extension
- XML PHP Extension
- ZipArchive Extension

In most servers, these extensions are enabled by default, but you should check with your hosting provider.

### **2. How to install the script?**

**Ans :** To install the script follow the steps below.

- Extract the downloaded .zip file from codecanyon on your PC.

- **Upload** the Install.zip file to your server **public\_html** or any other **directory** you intend to run the script.
- **Extract** the zip file in that directory.
- Create a new database from your server **MySQL database**.
- Create a DB **user** to the database and link that **database** to the **DB user**.
- First, hit your **site URL** and it will automatically take you to the **installation**.
- Click on the **Start Installation Process**.
- You will get the **Checking File Permission** page. If everything is ok then click on **Go to the next step**.
- Now you need to set **Database Host, Database Name, Database Username, Database Password**, and click **Continue**.
- Now you need to **import the SQL file**.
- Now **fill up the information of the shop** and click **Continue**.
- Click on **Go to Home/ Login to the admin panel**.

### 3. How to activate the script?

**Ans :** Following the given procedure below will make the license activated for your domain and you'll be able to use the script smoothly:

- Open the link in the browser.
- In the respective fields, put your Name, E-mail, **CodeCanyon Username, Purchase Key** and your intended **domain name** for the script and verify the captcha.
- The form will be submitted to check the purchase key and then activate the licence for that domain.
- You can change the activation later from this same form. Activating a Regular license again with another domain name will remove the activation of the previous domain.

### 4. How to download the latest version?

**Answer:** To download your item(s):

- Login to your Codecanyon account.
- Hover over your username from the top right corner and click 'Downloads' from the drop-down menu.
- The downloads section displays a list of all the items purchased using your account.
- Click the 'Download' button next to the item and select 'Main File(s)' which contains all files, or 'Licence Certificate and Purchase Code' for the item licence information only.

## 5. How to upgrade to the Latest Version?

Answer:

- a. Extract the **downloaded file** from codecanyon.
- b. There you will get a zipped folder named '**updates.zip**'. Upload that to the root directory on your server in where your previous version is running. **Unzip** that updates.zip file by selecting "**Extract here**".
- c. Now **reload** the home page and click on '**Update Now**'.
- d. **It's Done!**
- e. The full system has been **updated** with a **single click**.
- f. Let's Browse Active eCommerce cms **Latest Version**.

## 6. Where will I find purchase code?

Answer:

- **Log into** your Envato Market account.
- Hover the mouse over your **username** at the top of the screen.
- Click '**Downloads**' from the drop-down menu.
- Click '**License certificate & purchase code**' (available as PDF or text file).

## 7. How to upload products from admin?

Ans : There are several steps to upload a product. Follow the instructions below,

- a. Click on "**products**" from the admin side.
- b. Then "**add new Products**" button.
- c. Product information - Need to fulfill the required field with proper data one by one.
  - i. **General**
    1. Insert a product **name**.
    2. Select a **category** from the dropdown list
    3. Select a **sub category**.
    4. Select a **sub sub category**.
    5. Select a **brand**.
    6. Insert the product **unit** like **pc, kg, ltr** etc.
    7. Insert the product's **Minimum quantity**
    8. Input single/multiple words for product tag and press **enter**.

## 9. Barcode

### ii. Images

1. Main images - Preferable size **700 x 700**.
2. Thumbnail images - Preferable size **350 x 350**

### iii. Video

1. Select one option from **youtube, vimeo, dailymotion**.
2. Insert video **link**.

- j. You can also make any flash deal featured & it will appear in home page after main banner section
- k. Admin can **edit/delete** the existing deal or can **publish/unpublish** the deal anytime from the list.

- I. You also get a link of all created flash deals. You can use those links in banners.

Flash Deal Information

|                             |  |
|-----------------------------|--|
| Title                       | <input type="text"/>   |
| Background Color (Hex-code) | #FFFFFF  |
| Text Color                  | Select One   |
| Banner (920x500)            | <input type="button" value="Browse"/> <input type="button" value="Choose File"/> |
| Date                        | <input type="text"/>   |
| Products                    | Nothing selected   |

**save**

## 18. How to Manage Orders?

Ans : From Admin panel Admin will navigate Sales. Here admin can show **All orders, In house orders, sellers orders, Pickup orders.**

- The order list page admin will get the information of **order code, number of products, customer name, amount, delivery status, payment method & payment status.**
- From the “**Actions**” button admin will get the options like **view, invoice download, delete.**
- From the “**view**” option, the admin can see details of the order and can change the status of **payment & delivery.**

The screenshot shows two pages of a POS system. The top page is 'All Orders' with a table of 10 orders. The bottom page is a detailed view of order #202009-18580573 for 'Kushal Chavan'.

**All Orders Table:**

| #  | Order Code      | Num. of Products | Customer       | Amount    | Delivery Status | Payment Status | Refund    | Options |  |  |
|----|-----------------|------------------|----------------|-----------|-----------------|----------------|-----------|---------|--|--|
| 1  | 202009-18580573 | 5                | Kushal Chavan  | \$69.72   | Pending         | Unpaid         | No Refund |         |  |  |
| 2  | 202009-18594746 | 4                | Mr. Seller     | \$74.30   | Pending         | Unpaid         | No Refund |         |  |  |
| 3  | 202009-19024912 | 1                | Mr. Seller     | \$26.48   | Pending         | Unpaid         | No Refund |         |  |  |
| 4  | 202009-18054321 | 4                | Kushal Chavan  | \$4547.00 | Pending         | Unpaid         | No Refund |         |  |  |
| 5  | 202009-18050688 | 0                | Kushal Chavan  | \$0.00    | Delivered       | Unpaid         | No Refund |         |  |  |
| 6  | 202009-18035229 | 1                | Kushal Chavan  | \$799.00  | Pending         | Unpaid         | No Refund |         |  |  |
| 7  | 202009-09595978 | 1                | Oquek (889341) | \$89.00   | Pending         | Unpaid         | No Refund |         |  |  |
| 8  | 202009-13394970 | 1                | Admin          | \$699.00  | Pending         | Unpaid         | No Refund |         |  |  |
| 9  | 202009-13364752 | 3                | Oginn          | \$1336.00 | Pending         | Paid           | No Refund |         |  |  |

## 19. How to Manage Sellers?

Ans : In this page admin can see the **list of the sellers** and can **edit** the customer's information. By Clicking on the **Action** button admin can Check Sellers Profile, Log in as a seller, Payment history. Admin also can **pay, Edit, delete and Ban** the seller from here.

By clicking on the **"Add new"** button admin can create a new seller by putting seller **name, email & password**. Here sellers also can check **seller's payout amount, Sellers Payout request, Seller commissions, Seller package, sellers verifications form**.

The screenshot shows the 'All Sellers' page with a list of 7 sellers. A context menu is open for the 5th seller, 'Computer seller'.

**All Sellers Table:**

| # | Name             | Phone      | Email Address                   | Verification Info | Approval | Num. of Products | Due to seller | Options |
|---|------------------|------------|---------------------------------|-------------------|----------|------------------|---------------|---------|
| 1 | Mr. Seller       | 12345678   | seller@example.com              |                   |          | 17               | \$0.00        |         |

\*\*\*Please note that, for SSLCommerz you have to set your site default currency is **BDT**. This method is only for **Bangladesh**.

- viii. **Payhere Credential**- Insert the Merchant ID, **secret key**, **Currency**, **Payhere Sandbox mood**. Then click on **save**.
- ix. **Ngenius Credential**- Insert the Ngenius Outlet ID, Ingenious APK, currency and click on save.
- x. **Mpesa Credential**- Insert Mpesa consumer key, Consumer secret, Short code, Mpesa sandbox Activation and click on to save.
- xi. **Flutterwave Credential**- Insert the Rave public key, Rave Secret key, Rave Title, Staging Activation And click on Save.

### 23. How to configure the SMTP system?

Ans : To configure the SMTP system follow the steps below.

- If you're using cpanel then follow this link <https://blog.cpanel.com/setting-up-and-troubleshooting-smtp-in-cpanel/>
- Create an email from your server panel
- After creating an email account, go to Active ecommerce admin **Dashboard -> Setup And Configuration -> SMTP settings**.
- Fill up the form as below:
  1. **MAIL DRIVER** : smtp
  2. **MAIL HOST** : your domain smtp host (sample: smtp.yourdomain.com)
  3. **MAIL PORT** : 587/465
  4. **MAIL USERNAME** : Your email id
  5. **MAIL PASSWORD** : Your email password
  6. **MAIL ENCRYPTION** : ssl/tls
  7. **MAIL FROM ADDRESS** : Your mail address

## 8. MAIL FROM NAME : Your shop name

The screenshot shows the 'Mail Client Manual Settings' page in cPanel. It is divided into two main sections: 'Secure SSL/TLS Settings (Recommended)' and 'Non-SSL Settings (NOT Recommended)'. Both sections contain fields for Username, Password, Incoming Server (IMAP/POP3 Port), and Outgoing Server (SMTP Port). A note at the bottom of each section states: 'IMAP, POP3, and SMTP require authentication.'

| Secure SSL/TLS Settings (Recommended)        |  |
|--|--|
| Username:                                    | robert@demo.plothost.com                           |
| Password:                                    | Use the email account's password.                  |
| Incoming Server:                             | demo.plothost.com<br>IMAP Port: 993 POP3 Port: 995 |
| Outgoing Server:                             | demo.plothost.com<br>SMTP Port: 465                |
| IMAP, POP3, and SMTP require authentication. |  |

| Non-SSL Settings (NOT Recommended)           |   |
|--|---|
| Username:                                    | robert@demo.plothost.com                                |
| Password:                                    | Use the email account's password.                       |
| Incoming Server:                             | mail.demo.plothost.com<br>IMAP Port: 143 POP3 Port: 110 |
| Outgoing Server:                             | mail.demo.plothost.com<br>SMTP Port: 25                 |
| IMAP, POP3, and SMTP require authentication. |   |

Now click on Save.

The screenshot shows the 'SMTP Settings' page under 'Setup & Configurations' in the POS System. The left sidebar highlights 'SMTP Settings'. The main form contains fields for Type (set to 'SMTP'), MAIL HOST (set to 'smtp.gmail.com'), MAIL PORT (set to '465'), MAIL USERNAME, MAIL PASSWORD, MAIL ENCRYPTION (set to 'ssl'), MAIL FROM ADDRESS, and MAIL FROM NAME. A red arrow points to the 'Save' button at the bottom right of the form.

## 24. How to configure Facebook login API?

Ans : To configure facebook login api follow the steps below.

- Log into <https://developers.facebook.com> using facebook email and password.
- Click on **My App** and then click the Add **New App**.

- c. Give the name of the app and then click on **Create App ID**. It will automatically redirect to App dashboard.
- d. Then go to **Settings -> Basic**.
- e. Set the **App Domains** and click on **Save Changes**.
- f. Get the **App ID** and **App Secret**.
- g. Now click on **Products** and select **Facebook login**.
- h. It will redirect you to **Quick Settings**.
- i. Select **Web** and give your site url and click **Save**.
- j. Go to **Facebook login -> Settings**.
- k. Set the **Valid OAuth Redirect URIs**  
(example:<https://example.com/social-login/facebook/callback>) and click on **Save**.
- l. Now go to Active Ecommerce admin **Dashboard -> Setup And Configuration -> Social media login** and set the **App ID** and **App Secret** in Facebook Login Credential.
- m. Click on **Save**.

## 25. How to configure Facebook pixel?

**Ans:** Login to your admin panel

- Then go to left navigation bar and click **Setup And Configuration> Analytics Tool**
- Click **turn on the switch of facebook pixel**
- Then fill the field with **Pixel ID**.
- For getting your pixel id please follow the steps
- Log in to Facebook and go to your Ads Manager account.
- Open the Navigation Bar and select Events Manager.
- Here you'll find your pixel id.

The screenshot shows the Admin panel interface. On the left, a sidebar lists various configuration sections: Marketing, Support, Website Setup, Setup & Configurations (which is expanded to show General Settings, Features Activation, Languages, Currency, Pickup Point, SMTP Settings, Payment Methods, File System Configuration, Social Media Logins, Analytics Tools, Facebook Chat, Google reCAPTCHA, Shipping Configuration, Shipping Countries, Affiliate System, Offline Payment System, and Paytm Payment Gateway). The main content area is divided into two sections: 'Facebook Pixel Setting' and 'Google Analytics Setting'. The Facebook Pixel Setting includes a switch labeled 'Facebook Pixel' and a text input field for 'Facebook Pixel ID' with a 'Save' button. The Google Analytics Setting includes a switch labeled 'Google Analytics' and a text input field for 'Tracking ID' with a 'Save' button. A note above the settings says: 'Please be careful when you are configuring Facebook pixel.' Below the note, three steps are listed: 1. Log in to Facebook and go to your Ads Manager account. 2. Open the Navigation Bar and select Events Manager. 3. Copy your Pixel ID from underneath your Site Name and paste the number into Facebook Pixel ID field.

## 26. How to configure google login API?

Ans : To configure google login api follow the steps below.

- a. Go to <https://developers.google.com/identity/sign-in/web/sign-in>.
- b. Click on **Configure A Project**.
- c. Give your project name and click next.
- d. Give your product name and click next.
- e. Configure Oauth client by selecting the web **server** and give your **Authorized redirect URLs** (example:<https://example.com/social-login/google/callback>) and click on **Create**.
- f. Then you will get the **Client ID** and **Client Secret**.
- g. Now go to Active Super Shop admin **Dashboard -> Setup And Configuration > Social media login** and set the **Client ID** and **Client Secret** in Google Login Credential.
- h. Click on **Save**.

## 27. How to configure Twitter API?

Ans : To configure twitter login api follow the steps below.

- a. Go to <https://developer.twitter.com/en/apps>.
- b. Click on **Create An App**.
- c. Fill in your application details.
- d. After creating the app follow their steps to get **client Id & client secret**.
- e. Now go to Active Super Shop admin **Dashboard -> Setup And Configuration-> Social media login** and set the **Client ID** and **Client Secret** in Twitter Login Credential.
- f. Click on **Save**.

## 28. How to configure Facebook Chat ?

Ans: Login admin panel and go **Setup And Configuration > Facebook chat**

- **Enable** Facebook chat and insert page ID.
- Now reload homepage.That's it.

## 29. How to Setup Currency?

Ans : To configure currency from the existing list, follow the steps below.

- **Switch on** the required currency and **save** from all currency lists.
- Select **system default currency** and **save**.
- Select **symbol format & no of decimals** and **save**.
- To add new currency - Insert **currency name, currency symbol, currency code, exchange rate with 1 dollar**, publish **status on** and then **save**. Then follow the configuration instructions.

## 30. How to add a new currency?

Ans : Go to left navigation bar and click **Setup & configuration > Currency**

- Click add new currency
- Fill the form with **Name(eg US Dollar), Symbol(eg \$), Code(eg USD), exchange rate(1USD = ? eg 100)**
- And then click **save**.

- You can also edit a currency and make a currency as default.

### 31. How to Setup language?

Ans : To set language go to **admin navigation >Setup And Configuration > languages**.

- Select **system default Language** and **save**.
- click on the “**add new**” button.
- Insert **language name & code**(short form of language name).
- Click **save**. Page will redirect to the listing page.
- Select “**view**” from “**actions**” button on required language from the list.
- Input the **value** of the **key** words according to the language. These words will appear on the site.
- Then click on **save**.

| # | Name    | Code | RTL | Options |
|---|---------|------|-----|---------|
| 1 | English | en   | Off |         |
| 2 | Bengali | bd   | Off |         |
| 3 | Arabic  | sa   | On  |         |

### 32. How to manage general settings?

Ans : To set the site's general information here are some fields. Insert this information.

- Insert **system/site name**.
- Insert **Company address**.
- Write a **description**. Which will appear on the footer.
- Add **phone number**.
- Add system **email** address.
- Add a **logo** for the site.
- Add links to social media(**facebook, instagram, twitter, youtube, google plus**).
- Click on **save**.

### 33. How to manage the Staff panel?

Ans : Go to admin panel **navigation > staffs**.

- **All Staffs** - In this list staff's **name, email & role** are available. Admin can edit these information and can change their role. Also can delete any staff from here. Roles need to be created from the staff **permissions** tab first.
- **Staff Permissions** - First admin will create a role for the staff. According to the role admin will select the accessible section for the staff.

### 34. How to manage shipping for products?

Ans: On product upload form admin and seller both will get the options for Local Pickup cost, Flat Rate and Free shipping option.

- From switch you can enable or disable

- Click on **Save**.

#### b. Cart Base :-

- Type the coupon code
- Enter the minimum shopping price in “**Minimum Shopping**” field
- Enter the “**Discount**” and Select “**Discount Type**”
- Enter the “**Maximum Discount Amount**”
- Enter the “**Discount**” and Select “**Discount Type**”

vi. Click on **Save**.

| # | Code             | Type         | Start Date | End Date   | Options   |
|---|------------------|--------------|------------|------------|---|
| 1 | 2222444          | Product Base | 05-05-2020 | 25-12-2020 |   |
| 2 | FREE2019         | Product Base | 11-10-2019 | 30-10-2019 |   |
| 3 | Free50           | Product Base | 23-09-2019 | 05-10-2019 |   |
| 4 | IOADUOIUAUJOJOAA | Product Base | 19-09-2019 | 19-09-2019 |   |
| 5 | siddharaj        | Product Base | 26-08-2019 | 27-08-2019 |   |
| 6 | anand41          | Product Base | 03-09-2019 | 01-10-2019 |   |
| 7 | CT050            | Product Base | 02-08-2019 | 10-08-2019 |   |

### 37. How to use a coupon?

Ans : Before "SELECT PAYMENT OPTION", there is an opportunity to apply COUPON to get a discount.

- Before "SELECT PAYMENT OPTION", Click on "**Apply Coupon Code**"
- Enter the right **Coupon Code** and click **Apply**.

### 38. How to request money withdraw as a seller?

Ans : Registered sellers will get an option for making withdrawal money requests. If he/she has money in his/her earnings balance then he/she will be able to send a withdrawal request.

- Log in as a seller .
- Go to the left navigation bar and click **Money Withdraw**.
- Click **Send withdraw request**.

### 39. How to pay payment for seller withdrawal requests as an admin?

**Ans :** Go to left navigation bar and click **Sellers > Sellers Payout Requests**

- From the withdrawal list click **on the Cash symbol**.
- In the modal you can change the withdrawal amount and then select a payment method.
- And finally **pay the button** to make payment.
- For cash payment will be done immediately and you've to make payment to the seller manually.
- And for other payment gateways(if the seller has enabled & configured those gateways) you'll be redirected to the payment page.
- Then you need to fill necessary fields to make the payment.

#### 40. How to enable maintenance mode?

**Ans :** Go to left navigation bar and click **Setup & Configuration > Features Activation**

- Then turn on the switch for maintenance mode.
- And the frontend user will get an under construction page.

#### 41. How to create a pickup point?

**Ans :** You need to enable pickup point to use this feature from **Setup & Configuration > Features Activation - pickup point activation switch**

- Then go to left navigation bar and click **Setup & Configuration > Pickup point**
- Click **add new pickup point**
- Then fill the form with **Name, Location, Phone, Status, Manager** and hit **save** button.
- Now customers can select a pickup point from enabled pickup point when he/she will purchase products.
- And the pickup point manager will get the order in his/her dashboard.

#### 42. How does customer chat with a seller work?

**Ans:** Customers can ask any question about a product to the seller of that product.

- If the seller of that product is admin, then the admin will get the message against that product.
- Customer must need to login to make any question about any product/
- Then the seller/admin can answer that question from his/her panel.
- Customer will see the answer in his panel **left navigation > Conversations**
- Customers will see all questions, conversations with the admin/seller will be seen on that page.
- Sellers will get all messages in his panel **left navigation > Conversations**
- Admin will get all messages in his panel **left navigation > Conversations**

#### 43. How to add Attribute for the system?

**Ans :** Follow the below steps to add attribute system :

- **Login** into your admin panel.
- Go to **E-commerce Setup -> Attribute**.
- Click on **add new attribute**.
- Fill the **attribute name** like: size, fabric, storage etc.
- Click on **save**.

#### 44. How does attribute work?

**Ans :** At the time of product uploading Vendor or Admin can use attributes for their product variations. For example, a vendor is going to upload a new product mobile. Vendor has three different variation's mobile based on storage. For this he just needs to select the attribute like storage and then he just puts the value like 32 GB , 64GB, 128GB. After that he can set the price as previously how he did.

#### 45. What is the new advanced filter option?

**Ans :** Advance filter option means customer or user can search any product using attribute value. For example, Storage is an attribute and 32GB, 64GB, 128GB are the value of Storage attribute's. If any user or customer wants to see the all mobile of 32B storage he just needs to follow the below steps:

- Users or customers just go to the **product listing page**.
- There he/she will get the **value of attributes** at the **left side** below the categories list.
- He/She needs to **select 32GB** and click on **Apply Filter**
- He/She will get the **result**

#### 46. How to upload bulk products from the admin panel?

**Ans:** To upload bulk products from admin follow the below steps:

- First of all admin needs to login into his Admin Panel and go to the **Bulk Upload** menu from the left side bar.
- Admin needs to download the **Download CSV** file.
- Open the downloaded file and fill the information of products like name, category id, sub-category id, brand id, unit price etc.
- After putting the information of all products now he needs to upload the file.
- To upload that file he needs to go to the **Product upload** sub-menu under the **Bulk Upload** menu.
- There he will get the file upload form and then needs to choose the file and click on the Upload button.
- Products will be uploaded.

#### 47. How to upload bulk products from the Seller panel?

**Ans:** To upload bulk products from seller follow the below steps:

- First of all, the seller needs to login into his Seller Panel and go to the **Bulk Upload** menu from the left side bar.
- Admin needs to download the **Download CSV** file.
- Open the downloaded file and fill the information of products like name, category id, sub-category id, brand id, unit price etc.
- After putting the information of all products now he needs to upload the file.
- To upload that file he needs to go to the **Bulk Upload** menu.

- There he will get the file upload form and then needs to choose the file and click on the **Upload** button.
- Products will be uploaded.

#### 48. How to translate using Google translate?

**Ans:** Follow the below steps:

- First go to **Setup & Configuration -> Language -> Translation**
- Translate the site using “Google Translate” browser extension into your language.  
<https://chrome.google.com/webstore/detail/google-translate/aapbdbdomjkkjkaonfhkkikf gjllcleb?hl=bn>
- Click on translate extension and the **click translate this page**

- Press the “**Copy Translations**” button and then click on “**Save**”.

#### 49. How to use Classified Products?

**Ans:** To use classified products:

- From admin panel Turn on **Classified Products** from **Setup & Configuration -> Features Activation**
- Create classified packages for customer to purchase from **Customers >Classified Packages**

- Then customers can purchase classified packages and upload classified products as product upload.
- You'll see all classified product in **Products>Classified Products**
- You need to approve all classified product manually to show in home/listing page
- Classified product shows on the home page under category wise products
- Users can check the details of the classified product and contact the owner to purchase.

## 50. . How to use Digital Products?

**Ans:** To use digital products:

- From the admin panel create the Digital product category.
- Upload digital products from the admin or seller panel.
- Customers can purchase the digital products.
- Digital products can only be purchased by online payment.

## 51. How to configure amazon s3 file system?

To use amazon s3 file system follow the procedure mentioned below:

- Firstly, login into AWS dashboard. And select the s3 service from the list.

The screenshot shows the AWS Management Console dashboard. The 'Storage' service (S3) is highlighted with a red box in the 'Recently visited services' section. The 'AWS services' sidebar on the left also lists 'Storage' under 'Compute'. The main content area displays various AWS services like IAM, S3, Compute, and Storage.

- Then click the **Create bucket** button.

- After that, a modal will come up. In there insert your bucket name and the region you want your bucket to reside in.

- For step 2 and 3 do nothing just click **Next** then when the 4th step appears click create bucket and complete creating the bucket.

- Then you'll be able to see the bucket that you created. Click on the bucket.

- It'll take you to the bucket details. From there go to the **Permissions** menu and then click on the **Bucket Policy** below there you will find the **Policy generator** blue button. Click it.

- The UI will appear after clicking the button. For the policy type insert **S3 Bucket Policy** and for **Principal** insert \* and from the **Actions** dropdown select box select **getObject**. And follow the convention mentioned inside the red box highlighted with red text color for the **ARN value**. The ARN value will be found in the previous page from where we came from. Just follow the instructions mentioned inside the images below.

**AWS Policy Generator**  
The AWS Policy Generator is a tool that enables you to create policies that control access to Amazon Web Services (AWS) products and resources. For more information about creating policies, see [Key Concepts in Using AWS Identity and Access Management](#). Here are sample policies.

**Step 1: Select Policy Type**  
A Policy is a container for permissions. The different types of policies you can create are an [IAM Policy](#), an [S3 Bucket Policy](#), an [SNS Topic Policy](#), a [VPC Endpoint Policy](#), and an [SQS Queue Policy](#).

Select Type of Policy: [S3 Bucket Policy](#)

**Step 2: Add Statement(s)**  
A statement is the formal description of a single permission. See a [description of elements](#) that you can use in statements.

Effect:  Allow  Deny

Principal:

AWS Service:  Amazon S3  All Services (\*)

Actions:  Action(s) Selected  All Actions (\*)

Amazon Resource Name (ARN):  arn:aws:s3:::testing-my-bucket/\*

Add Conditions (Optional)

**Paste the ARN and don't forget to add '/' after the ARN**

**Step 3: Generate Policy**  
A [policy](#) is a document (written in the Access Policy Language) that acts as a container for one or more statements.

Add one or more statements above to generate a policy.

Policy JSON Document

Click below to edit. To save the policy, copy the text below to a text editor. Changes made below will not be reflected in the policy generator tool.

```
{
  "Id": "Policy1600695868258",
  "Version": "2012-10-17",
  "Statement": [
    {
      "Sid": "Stmt1600695832250",
      "Action": [
        "s3:GetObject"
      ],
      "Effect": "Allow",
      "Resource": "arn:aws:s3:::testing-my-bucket/*",
      "Principal": "*"
    }
  ]
}
```

This AWS Policy Generator is provided for informational purposes only, you are still responsible for your use of Amazon Web Services technologies and ensuring that your use is in compliance with all applicable terms and conditions. This AWS Policy Generator is provided as is without warranty of any kind, whether express or implied.

**Close**

- And paste it inside the box shown below. And then click **Save**.

The screenshot shows the AWS S3 Bucket Policy editor for the bucket 'testing-my-bucket'. The 'Bucket Policy' tab is selected. The policy document is displayed in a code editor:

```

1  {
2    "Id": "Policy16000695868258",
3    "Version": "2012-10-17",
4    "Statement": [
5      {
6        "Sid": "Stmt16000695832250",
7        "Action": [
8          "s3:GetObject"
9        ],
10       "Effect": "Allow",
11       "Resource": "arn:aws:s3:::testing-my-bucket/*",
12       "Principal": "*"
13     }
14   ]
15 }

```

A red box highlights the policy document. A red arrow points from the 'Save' button in the top right corner to the 'Save' button in the bottom right corner of the code editor.

Documentation Policy generator

- You might encounter an error shown below.

The screenshot shows the AWS S3 Bucket Policy editor for the bucket 'testing-my-bucket'. The 'Bucket Policy' tab is selected. A red box highlights an 'Error' message: 'Access denied'. A red arrow points from this message to the text 'You might get this error'.

The policy document is displayed in the code editor:

```

1  {
2    "Id": "Policy16000695868258",
3    "Version": "2012-10-17",
4    "Statement": [
5      {
6        "Sid": "Stmt16000695832250",
7        "Action": [
8          "s3:GetObject"
9        ],
10       "Effect": "Allow",
11       "Resource": "arn:aws:s3:::testing-my-bucket/*",
12       "Principal": "*"
13     }
14   ]
15 }

```

Bucket policy editor ARN: arn:aws:s3:::testing-my-bucket  
Type to add a new policy or edit an existing policy in the text area below.

Delete Cancel Save

The block public access settings turned on for this bucket prevent granting public access.

- To get rid of this error you need to go to the **Permissions** menu and then go to the **Block public access** menu and then click the **Edit** button shown below.

testing-my-bucket

Overview Properties Permissions Management Access points

Block public access Access Control List Bucket Policy CORS configuration

**Block public access (bucket settings)**

Public access is granted to buckets and objects through access control lists (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to all your S3 buckets and objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use cases. [Learn more](#)

**Block all public access**

On

- Block public access to buckets and objects granted through **new access control lists (ACLs)**
- On
- Block public access to buckets and objects granted through **any access control lists (ACLs)**
- On
- Block public access to buckets and objects granted through **new public bucket or access point policies**
- On
- Block public and cross-account access to buckets and objects through **any public bucket or access point policies**
- On

**Edit**

- After you have gone to the menu mentioned above uncheck the checkbox saying the following **“Block all public access”** and then click the **Save** button. A pop up will appear and tell you to type in the word **‘confirm’** and then click the **confirm** button.

Overview Properties **Permissions** Management Access points

Block public access Access Control List Bucket Policy CORS configuration

**Block public access (bucket settings)**

Public access is granted to buckets and objects through access control lists (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to all your S3 buckets and objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use cases. [Learn more](#)

**Block all public access**

Turning this setting on is the same as turning on all four settings below. Each of the following settings is independent of one another.

- Block public access to buckets and objects granted through new access control lists (ACLs)**  
S3 will block public access permissions applied to newly added buckets or objects, and prevent the creation of new public access ACLs for existing buckets and objects. This setting doesn't change any existing permissions that allow public access to S3 resources using ACLs.
- Block public access to buckets and objects granted through any access control lists (ACLs)**  
S3 will ignore all ACLs that grant public access to buckets and objects.
- Block public access to buckets and objects granted through new public bucket or access point policies**  
S3 will block new bucket and access point policies that grant public access to buckets and objects. This setting doesn't change any existing policies that allow public access to S3 resources.
- Block public and cross-account access to buckets and objects through any public bucket or access point policies**  
S3 will ignore public and cross-account access for buckets or access points with policies that grant public access to buckets and objects.

**Save**

- After you have done all the instructions mentioned above you need to have to go to **Permissions** -> **Bucket Policy** and now try and paste the texts and click the **Save** button as mentioned in the instruction above. If all goes well you should see the page shown in the image below. Saying the yellow text "**This bucket has public access**".

- Then, notice the top nav of your page and there is a button saying **Services**. When you hover over it it drops a menu down.

- Inside the menu there is a search bar. Inside the search bar type in '**iam**' and search result will be shown to you. Select the first result that comes up.

- Then go to the **User** menu as shown in the image below and click the **Add user** button.

- After you have clicked the Add User button a page will appear on your browser. There you will see a form. And you need to type in your **User-name** and check the **Programmatic Access as the Access Type**. Just follow the instructions mentioned in the image below.

Add user

Set user details

You can add multiple users at once with the same access type and permissions. [Learn more](#)

User name\*  [Add another user](#)

Select AWS access type

Select how these users will access AWS. Access keys and autogenerated passwords are provided in the last step. [Learn more](#)

Access type\*  **Programmatic access**  
Enables an **access key ID** and **secret access key** for the AWS API, CLI, SDK, and other development tools.

**AWS Management Console access**  
Enables a **password** that allows users to sign-in to the AWS Management Console.

\* Required

Cancel **Next: Permissions**

- After that you need to set some permissions. Inside the **Filter Policy** search bar search for the text **'s3'** And then some of the search results will be shown as shown below. From there check **AmazonS3FullAccess** and click the **Next** button.

Add user

Set permissions

Add user to group  Copy permissions from existing user  **Attach existing policies directly**

**Create policy**

**Filter policies**  Showing 4 results

| Policy name  | Type        | Used as                |
|--|-------------|------------------------|
| <input type="checkbox"/> AmazonDMSRedshiftS3Role                                 | AWS managed | None                   |
| <input checked="" type="checkbox"/> <b>AmazonS3FullAccess</b>                    | AWS managed | Permissions policy (1) |
| <input type="checkbox"/> AmazonS3ReadOnlyAccess                                  | AWS managed | None                   |
| <input type="checkbox"/> QuickSightAccessForS3StorageManagementAnalyticsReadOnly | AWS managed | None                   |

Set permissions boundary

Cancel [Previous](#) **Next: Tags**

- For the next option click next without changing anything at all.

## Add user

1 2 3 4 5

### Add tags (optional)

IAM tags are key-value pairs you can add to your user. Tags can include user information, such as an email address, or can be descriptive, such as a job title. You can use the tags to organize, track, or control access for this user. [Learn more](#)

| Key                                      | Value (optional)     | Remove |
|--|----------------------|--------|
| <input type="text" value="Add new key"/> | <input type="text"/> |        |

You can add 50 more tags.

[Cancel](#) [Previous](#) **Next: Review**

- Finally click **Create User**.

## Add user

1 2 3 4 5

### Review

Review your choices. After you create the user, you can view and download the autogenerated password and access key.

#### User details

|                      |  |
|----------------------|--|
| User name            | demoname                                 |
| AWS access type      | Programmatic access - with an access key |
| Permissions boundary | Permissions boundary is not set          |

#### Permissions summary

The following policies will be attached to the user shown above.

| Type           | Name                               |
|----------------|------------------------------------|
| Managed policy | <a href="#">AmazonS3FullAccess</a> |

#### Tags

No tags were added.

Cancel Previous **Create user**

- After you have created the user you will be directed to a page where you will find two keys.
  - Access Key ID and
  - Secret access key.

## Add user

1 2 3 4 5

### Success

You successfully created the users shown below. You can view and download user security credentials. You can also email users instructions for signing in to the AWS Management Console. This is the last time these credentials will be available to download. However, you can create new credentials at any time.

Users with AWS Management Console access can sign-in at: <https://183055781323.signin.aws.amazon.com/console>

 Download .csv

|   | User   | Access key ID | Secret access key  |
|---|--|---------------|--|
| ▶ | <input checked="" type="checkbox"/> demoname | AK[REDACTED]  | *****  Show  |

[Close](#)

- Copy these two keys and then go to your admin panel and go to the **Business Settings** menu and then to the **File System Configuration** sub-menu. And then there you will find the two fields where you will need to paste those two keys that you have just copied.

- Now you need to set your bucket region. For that go to your bucket details and follow the instruction shown inside the image to find the bucket region. Copy your bucket region and paste it inside the field **AWS DEFAULT REGION** field residing inside **File System Configuration's** submenu under the **Business Settings** Menu inside your admin panel.

- Also you need to insert your bucket name inside the **AWS BUCKET** field.
- And for the **AWS URL** just follow the convention mentioned inside the image below.

- And if you've followed all of the instructions mentioned above you should be able to upload your files inside the bucket of your amazon server's s3 file system.
- And also don't forget to activate your S3 File System shown inside the **blue box pointed out by a red arrow.**

## 52. How to migrate existing uploaded files to s3?

**Ans:** To migrate to amazon s3 file system follow the procedure mentioned below:

- Download all files from the public/uploads folder.
- Create a folder named uploads in the s3 bucket.
- Upload all downloaded files to the uploads folder of s3 bucket.

## 53. How to configure Ngenius credentials(test account)?

**And:** To configure ngenius you need to follow the steps mentioned below.

- First login to the Ngenius developers panel. [Ngenius developers panel](#)
- Or create an account if one does not exist.

- After that go to the **Settings -> Integrations -> service account**. Create one service account if it does not exist.

- There you will find the API key. Copy that API key and paste it inside your Ngenius credentials **NGENIUS API KEY** field inside the **Payment Method** sub-menu residing in the **Business Settings** menu.

| NAME                     | DESCRIPTION              | TYPE                     | API KEY   |
|--------------------------|--------------------------|--------------------------|---|
| Merchant service account | Merchant service account | Merchant Service Account | <a href="#">Show API key</a> <span style="color: red;">↓</span> |
| test                     | test                     | Merchant Service Account | <a href="#">Show API key</a> <span style="color: red;">↓</span> |

**Ngenius Credential**

NGENIUS OUTLET ID

NGENIUS API KEY

NGENIUS CURRENCY

Currency must be AED or USD or EUR  
If kept empty, AED will be used automatically

Save

- After that you need the OUTLET ID of your ngenius account for that you need to go the **Settings ->Organizational Hierarchy** then click the **instant\_signup\_outlet** . After that you will find your reference key pointed out with the red arrow; copy that key and paste it inside the you **NGENIUS\_OUTLET\_ID** field residing inside the **Payment Method** sub-menu residing in the **Business Settings** menu.
- Finally, Set your currency as **AED, USD or EUR** and click the **Save** button. If you have followed all of the steps mentioned above your app should be ready to go.

#### 54. Which options are translatable in multiple languages?

**Ans:** Following options are translatable in multi language:

- **Product:** Name, Unit, Description.
- **Category:** Name
- **Sub Category:** Name
- **Sub Sub Category:** Name
- **Attribute:** Name
- **Brand:** Name
- **Customer Product:** Name, Unit, Description
- **Customer Package:** Name
- **Flash Deal Product:** Title
- **Pages:** Page Title
- **Pickup Point:** Name, Location
- **Role:** Name

#### 55. How to configure Bkash payment gateway?

**Ans:** Follow below steps to configure bkash payment gateway:

- Contact bkash authority for getting api information
- Turn on bkash switch from admin panel **Setup & configuration > Feature Activation > Bkash Activation**
- Fill up bkash api information from **Setup & configuration > Payment Method > Bkash Credential**
- If bkash api is in the sandbox mood, turn on the sandbox switch. For live Turn off sandbox switch

#### 56. How to configure the Nagad payment gateway?

**Ans:** Follow below steps to configure Nagad payment gateway:

- Contact Nagad authority for getting api information
- Turn on Nagad switch from admin panel **Setup & configuration > Feature Activation > Nagad Activation**
- Fill up Nagad api information from **Setup & configuration > Payment Method > Nagad Credential**
- If Nagad api is in the sandbox mood input NAGAD MODE “sandbox”. For live input NAGAD MODE “live”

#### **57. How to configure product wise shipping cost?**

**Ans:** Follow below steps to configure city wise flat shipping cost:

- Go to admin panel **Setup & configuration > Shipping configuration and choose Product Wise Shipping Cost**
- Go to **Products > Add New Product from Shipping Configuration** you will get another 3 options
  - Free Shipping:** No shipping cost added
  - Flat Rate:** Fixed shipping cost will be added for every city
  - Product Quantity Multiplication:** Product quantity will be multiplied while purchasing if this option enable

#### **58. How to configure flat rate shipping cost?**

**Ans:** Go to admin panel **Setup &**

**configuration > Shipping configuration and choose Flat Rate Shipping Cost.**

**Flat Rate Shipping Cost:** How many products a customer purchases doesn't matter. Shipping cost is fixed.

#### **59. How to configure seller wise flat shipping cost?**

**Ans:** Go to admin panel **Setup & configuration > Shipping configuration and choose Seller Wise Shipping Cost.**

**Seller Wise Shipping Cost:** Fixed rate for each seller. If customers purchase 2 products from two sellers shipping cost is calculated by addition of each seller flat shipping cost.

#### **60. How to configure city wise flat shipping cost?**

**Ans:** Follow below steps to configure city wise flat shipping cost:

- Go to admin panel **Setup & configuration > Shipping configuration** and choose **Area Wise Flat Shipping Cost**
- Go to **Setup & configuration > Shipping Countries** and enable or disable **your preferred countries**
- Go to **Setup & configuration > Shipping Cities** and **create city for selected country** and input shipping cost for city

## 61. How to configure Redis cache support?

**Ans:** Follow below steps:

- Go to this link  
<https://www.techalyst.com/posts/install-and-configure-redis-server-for-laravel>  
and follow from **Step 1 to Step 5**
- Go to Admin panel **Setup & configuration > File System & Cache Configuration**
- Choose **Redis** option in **CACHE\_DRIVER & SESSION\_DRIVER** section and set **Redis Host, Redis Password and Redis Port** in **Redis configuration** section

Cache & Session Driver

|                |       |
|----------------|-------|
| CACHE_DRIVER   | redis |
| SESSION_DRIVER | redis |

Redis Configuration (If you use redis as any of the drivers)

|                |                |
|----------------|----------------|
| REDIS_HOST     | 127.0.0.1      |
| REDIS_PASSWORD | REDIS_PASSWORD |
| REDIS_PORT     | 6379           |

## 62. How to configure firebase console setup for push notification?

**Ans:** To use firebase follow the procedure which are mentioned below

- I. Go to this URL to create project <https://console.firebaseio.google.com/u/0/>

- II. Enter project name and then click on **continue** button

- III. Disable the Google analytics for this project option and click **Create project** button

IV. After then click on **continue** button

V. Now go to project settings to get server key

VI. To get server key click on Cloud Messaging option
